About Me

When I was still in vocational school, I majored in Software Engineering because my curiosity made me interested in entering that major.

and as time passed I finally graduated from the vocational school, then had the opportunity to continue my education at college by my parents.

From there I started to explore what I wanted and my goal was to make my parents happy because they had given me the opportunity to continue my education, and I also wanted to have a career in the IT field.

Education

Universitas Komputer Indonesia
2021 - Now
Informatics Engineering

SMK PUI Cikijing
2018 - 2021
Software Engineering

Experience

PT. Industri Telekomunikasi Indonesia (Persero) 2019-2020
Service

- In January 2020, I carried out Field Work Practice activities by the school.
- At that time I joined the SBU BROADBAND SERVICES Division with 5 of my friends.

Yayasan Tresna Bhakti (Bandel Apps) 2019 - 2020
Internship Students

- Learn to make a blogger, a simple portfolio, and the final project is learning to make a proverb guessing game. even though it only helped put the proverbs into the game pack with 1 of my friends. but it was really fun for me to get a new experience.
